GROUP OF COMPANIES

Tree plast is a renowned conglomerate comprising two distinguished entities in the field of Building Material products:

Mapl, a leading manufacturer of aluminum composite panels, boasts a rich history with 20 years experiences, With a strong focus on innovation and delivering top-notch quality products, Mapl has established a solid reputation in the industry. The company has built a robust network across India and is highly regarded by prominent architects for its exceptional products.

Telko, specializes in manufacturing aluminum sections and profiles, known for its precision and reliability.

Together, as part of the Tree plast group of companies, Mapl and Telko represent a powerhouse of expertise, innovation, and quality in building material industry, catering to a wide range of customers and projects with their exceptional products and services.

Characteristics

Natural wood looks

High weathering capability

Durable & long lasting

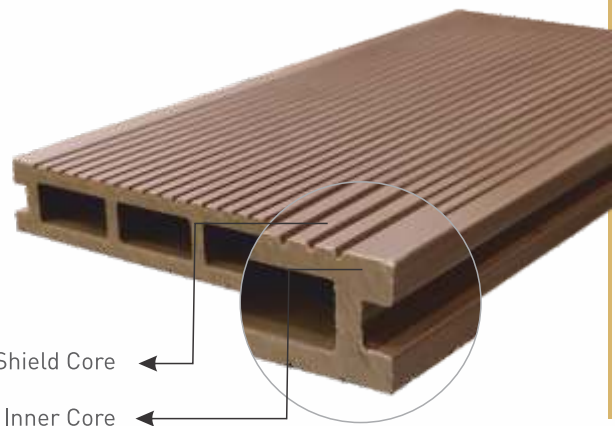

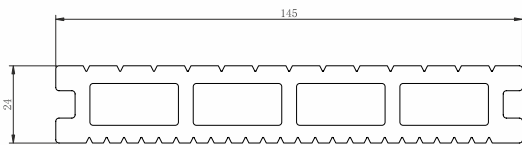

UV resistant & anti-fading

Barefoot safe

Low maintenance & costs

Length (mm)	2440	Thickness (mm)	24
Width (mm)	145	Sq.ft.	3.80

DECKING

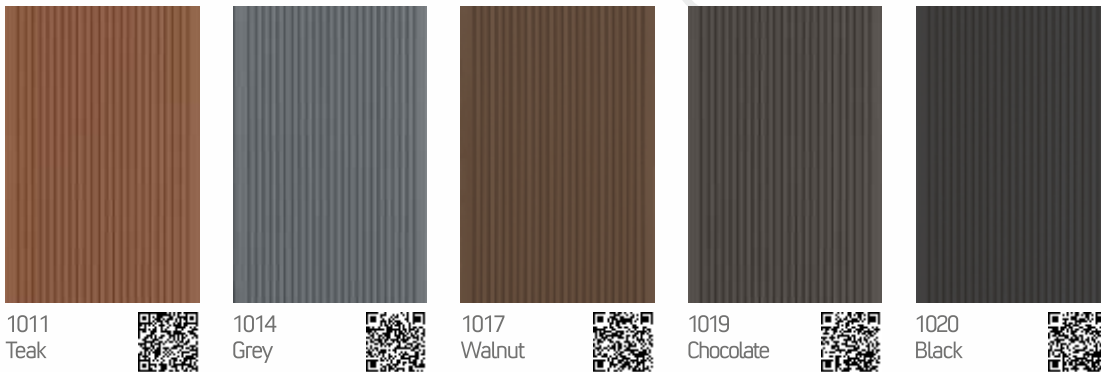

Tree plast decking is a convergence of aesthetics, exceptional durability & low maintenance to perfection. Our decking planks exhibit the appearance of pre-finished wood, with a weathering capability far greater than any natural timber. Resistant to fading, staining, scratching, fungus, splitting, cracking and rot, Tree plast deck planks unlike natural wood, do not require any maintenance of regular sanding, oiling, sealing or termite treatment.

Installed over an anti-corrosive aluminum framework with concealed fixtures and no exposed hardware, Tree plast decking is completely barefoot safe. A sustainable solution to wood decking, Tree plast decking is cost effective with low lifetime costs owing to no maintenance over its lifetime.

LOUVERS

Tree plast louver (Fluted Panel) display high quality wood finishes for a choice of exterior and interior architectural options. Exhibiting natural wood colours and textures, Tree plast sections are far more weather resistant than natural wood or metals in exterior conditions.

Tree plast sections are exceptionally high strength and durable. They require very low maintenance with no painting, sealing, coating or termite treatment. Being anti-corrosive and weather resistant in humid and high salinity conditions, Tree plast is the perfect replacement for wood and metals offering higher flexibility for various design requirements.

CLADDING

Tree plast cladding epitomizes beauty & durability to perfection. Embodying the most natural premium wood aesthetics with unparalleled weathering capabilities for cladding, Tree plast panels retain their vibrant colours and finish of premium wood for an exceptionally long lifetime.

Tree plast cladding panels are the ideal architectural solution for facades, walls and ceilings creating an aesthetic, weather resistant and insulating envelope around the building to withstand weather extremes and increase the lifespan of the building's exterior.

Easy to install, interlocking panels with concealed fixtures, result in a seamless and perfect finish. Tree plast cladding panels UV stable, maintenance free and a low lifetime cost solution.
